DASHBOARD

The screenshot shows the Databricks SQL Editor interface. On the left is a sidebar with navigation options like Home, Learn, Workspace, Catalog, Jobs & Pipelines, Compute, Discover, Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie Spaces, Alerts, Query History, and SQL Warehouses. The main area displays a SQL query in the editor, which has been executed. Below the query, a table of results is shown with columns: Unique_Customers, Date, Trans_year, Trans_Month, Trans_Month_Name, Trans_Day, and Trans_Day_Name. The table contains 7 rows of data. At the bottom, it indicates 655 rows and a 1.14s runtime.

```
SELECT COUNT(DISTINCT Customer_ID) AS Unique_Customers,
       Date,
       YEAR(Date) AS Trans_year, --Extract the year from the date column
       MONTH(Date) AS Trans_Month, --Extract the Month from the date column
       MONTHNAME(Date) AS Trans_Month_Name, --Extract the day name from the date column
       DAY(Date) AS Trans_Day, --Extract the day from the column
       DAYNAME(Date) AS Trans_Day_Name, --Extract the day name from the date column
       SUM("Total Amount") AS Revenue, --Calculate the total Revenue
       "Product Category"
FROM retail2.schema_retail.retail_sales_dataset
GROUP BY ALL;
```

Unique_Customers	Date	Trans_year	Trans_Month	Trans_Month_Name	Trans_Day	Trans_Day_Name
